

Preparing for the RAC-SCC Self-Assessment

Competency	Recommendations & Guiding Questions	Related Information
<p>019N - TO BE FAMILIAR WITH THE JOB FUNCTIONS OF A SPECIAL CARE COUNSELLOR & THE STEPS IN THE INTERVENTION PROCESS</p>	<p>Talk with a Special Care Counsellor (Behavior Technician, Special Ed. Tech, etc.) in your organization and ask them to share about their role and responsibilities. <i>How does this compare with your current role?</i></p> <p>OADIE is an acronym used to outline the steps of the intervention plan. You should be familiar with OADIE.</p> <p>THE INTERVENTION PLAN An effective intervention plan involves several steps. OADIE is one effective model that may be used for SCC intervention plans.</p> <p>O: Observe (gather information) A: Assess and analyze (identify needs, goals) D: Develop and design (identify activities and tools) I: Implement (put the plan into action) E: Evaluate and reflect (how did it go?) Think of a client you have worked with and think of the ways you applied OADIE, either formally or informally.</p>	<p>Read about the role and responsibilities of an SCC in a school environment. Here is one example from a job description:</p> <p>Nature of the work The principal and customary work of an SCC consists in working with a multidisciplinary team to apply special education techniques and methods in keeping with an individualized education plan intended for handicapped students or students with social maladjustments or learning difficulties or in keeping with a program designed for students requiring specific support.</p> <p>He or she helps students with learning activities in class. Within his or her competence, the employee helps a student to read and write and provides him or her with needed explanations; helps him or her with lessons and homework. He or she observes situations and works with students reacting to their environment; counsels them; applies to students in crisis situations intervention techniques conducive to calm and order; coaches them in their behaviour modification process; provides support to the teacher so as to ensure an environment conducive to learning in the classroom.</p> <p>He or she informs students of the various disorders or dependencies and, if necessary, meets with them to provide them with advice, help or referrals to specialized resources.</p>

		<p>He or she supervises students who, following a sanction, must receive instruction in another room; helps them with their schoolwork; determines with the students concerned and with the staff involved in intervention efforts the conditions for reintegrating the classroom.</p> <p>He or she may be required to accompany students with special needs on the arrival and departure of school buses.</p> <p>He or she records his or her observations and interventions, keeps files and prepares reports on a student's situation.</p> <p>He or she works, where necessary, with youth protection organizations and external interveners in matters pertaining, in particular, to parental abuse or negligence; where applicable, helps the school administration to conduct student searches.</p> <p>He or she meets with students, parents and teachers to provide them with advice, information.</p>
<p>019X – TO BE FAMILIAR WITH THE SCC CODE OF CONDUCT AND ETHICAL BEHAVIOR</p>	<p>Make sure you are familiar with the code of conduct either from your workplace or refer to the QASCC Code of Conduct:</p>	<p>Open the link for the SCC Code of Conduct from the Quebec Association of Special Care Counsellors: https://www.aeesq.ca/en/code-deontologie</p>
<p>019P – TO BE FAMILIAR WITH COMMUNITY RESOURCES</p>	<p>SCCs consult resources for the clients they work with. <i>Think of some resources you could refer a client to using this website.</i></p>	<p>Consult this website that provides a thorough repertoire of resources: 211QC.ca https://www.211qc.ca/en/directory/montreal</p>

019R-1 – HUMAN DEVELOPMENT ACROSS THE LIFESPAN

SCCs require an understanding of the many milestones of normal development across the lifespan to make sense of their observations and to make thorough assessments to identify client needs. Review the developmental domains to the right, and be prepared to discuss and give examples of some changes across the lifespan in **each** of the developmental domains.

Physical domain includes:

body size, body proportions, appearance, brain development, motor development, perception capacities, physical health.

Affective/social/behavioural domain includes:

self-knowledge (self-esteem, sexual identity, ethnic identity), moral reasoning, affect, understanding and expression of emotions, self-regulation, temperament, personality, understanding others, interpersonal skills, and friendships, Erikson's stages.

Cognitive domain includes:

thought processes and intellectual abilities including attention, memory, problem solving, imagination, creativity, academic and practical knowledge, metacognition, Piaget's stages.

Language and learning domain includes:

Development of speech, vocabulary, learning styles, conversation, grammar, reading skills, retrieving words, expressing oneself.

Sexuality domain includes:

Sexual identity, gender identity, intimate relationships, sexual pleasure and stimulation, hormonal changes, Freud's stages.

019W – TO BE FAMILIAR WITH FOUR APPROACHES USED IN SCC

SCCs do their work using certain intervention approaches. The following are four of the main approaches used.
Consider how you are using the following approaches with the clients you work with:

1. SYSTEMS APPROACH
2. CLIENT-CENTRED APPROACH
3. COGNITIVE-BEHAVIORAL APPROACH
4. BEHAVIOR MODIFICATION APPROACH

1.

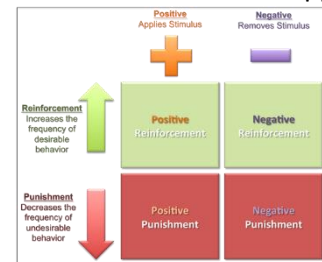

2. The History Of The Person-Centered Approach¹ by Howard Kirschenbaum

<https://www.adpca.org/content/history-0>

3. The focus of the Cognitive Behavioural Approach is on helping people learn how their thoughts impact and affect their feelings and behaviours.

4. Behavior Modification Approach

Go to this link for more information on Behavior Modification <https://www.psychologywizard.net/operant-conditioning-ao1-ao2-ao3.html>

019S – TO GATHER INFORMATION ON

SCCs gather information by observing and recording behavior using different methods. Some types of reports include **frequency** or

Here is an example of a simple frequency chart:

THE CLIENT'S BEHAVIOR

duration charts, rating scales, ABC analysis, checklists, narrative descriptions, event analysis, to name a few.

What type of reports have you participated in writing or are aware of in your workplace?

SCCs also write **summary reports** or **client profiles**. This type of report includes information gathered from both observations and interviews to help SCCs assess client needs.

Think about a client or clients you have worked with when reviewing the 'client profile' below:

**STANDARDIZED FORMAT
CLIENT PROFILE**

Name of Student:
Submitted:

Date

A. SOURCES OF INFORMATION:

B. IDENTIFYING INFORMATION

1. Name of client:
2. Date of birth:

C. FAMILY BACKGROUND INFORMATION:

1. **Family Constellation:**

Name	Gender	Age	Relationship to Client

2. **Psychosocial History of Family:**

D. REFERRAL HISTORY:

Date	Referred by	Place of Referral	Reason

Example

Behavior: Saying something nice

Behavior Definition: Making a statement to a peer or a teacher during class time, in a pleasant tone, which includes either praise or politeness, for example saying "you did well" or "excuse me"

Total Observation Time: 20 minutes

Length of each interval: 2 minutes

Date	Interval #										Total times behavior occurred (X)
11/5	1	2	3	4	5	6	7	8	9	10	3
0 or X	X	0	0	X	0	0	0	X	0	0	

	<p>E. <u>REASON FOR CURRENT REFERRAL/SERVICE:</u></p> <p>F. <u>CURRENT STATUS OF CLIENT:</u></p> <ol style="list-style-type: none"> 1. Medical Status: 2. Sensory and Psycho-motor Functioning: 3. Cognitive Skills: 4. Communication skills: Expressive/Receptive/Speech 5. Learning Style: 6. ADL/IADL: 7. Social/Interpersonal skills: 8. Affective/Behavioral Functioning: 9. Work/Vocational Skills: 10. Leisure/Recreational/Special Interests: <p>G. <u>CURRENT FAMILY SITUATION AND DYNAMICS:</u></p> <p>H. <u>CURRENT INTERVENTION OBJECTIVES (Agency, family, client):</u></p> <p>I. <u>ANALYSIS OF AREAS OF CONCERN</u></p> <table border="1" data-bbox="428 808 1192 932"> <thead> <tr> <th>Areas of Concern</th> <th>Possible Reasons</th> </tr> </thead> <tbody> <tr> <td>1.</td> <td>1.</td> </tr> <tr> <td>2.</td> <td>2.</td> </tr> <tr> <td>3.</td> <td>3.</td> </tr> </tbody> </table> <p>J. <u>IDENTIFIED NEED</u></p>	Areas of Concern	Possible Reasons	1.	1.	2.	2.	3.	3.	
Areas of Concern	Possible Reasons									
1.	1.									
2.	2.									
3.	3.									
<p>019Q – TO COMMUNICATE WITH CLIENTS AND MEMBERS OF YOUR TEAM</p>	<p>Communicating with clients and members of your team is a critical SCC skill. Think about the many verbal and non-verbal factors that can help or hinder communication.</p> <p><i>Think about the importance of using active listening skills. What listening skills do you use?</i></p>	<p>Barriers to Effective Communication</p> <p>Poor communication is often the result of multiple factors:</p> <p>1. Environmental barriers</p> <ul style="list-style-type: none"> ● space is too hot, too cold ● outside distractions or interference (noise, bright lights...) ● frequent interruptions 								

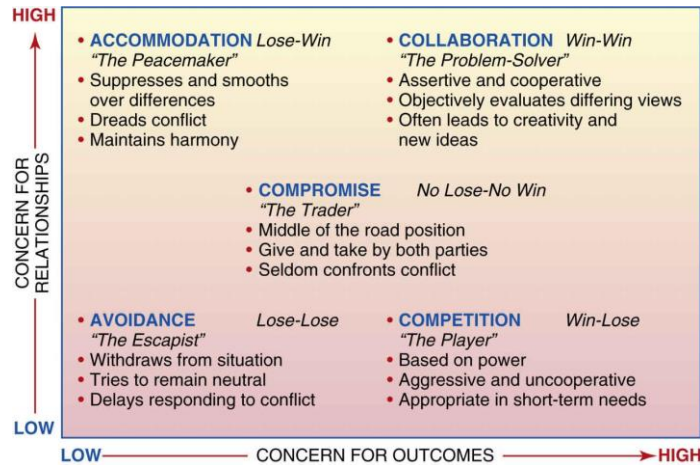

2. Barriers related to self

- having poor knowledge of the subject or being inadequately prepared
 - having strong feelings about the topic; not believing in the topic or subject
 - lack of interest in the topic
 - preoccupation with other things or thoughts; not giving full attention to the conversation
 - unintentionally not saying what we mean
 - physical challenges: preoccupation with pain or not feeling well
 - level of energy; fatigue
 - wanting to please or impress the other person
 - having negative or hostile feelings or reactions to the other
 - jumping to conclusions; making judgments and assumptions without checking them out
 - being temporarily preoccupied with other concerns
 - unconscious nonverbal signals inconsistent with spoken message
 - moralizing; preaching; persuading with logic; arguing; lecturing
 - taking up a lot of airtime
 - being attached to specific outcomes (rather than open to new possibilities)
 - wanting to “fix” things: giving advice when not asked for; analyzing; diagnosing
 - name-calling; ridiculing; sarcasm; criticizing; blaming; threatening; warning
 - withdrawal; inappropriate silences
 - excessive praising; agreeing
 - betraying confidences
 - lying; intentionally omitting or withholding information; intentionally misleading
-

		<p>3. Temporal barriers</p> <ul style="list-style-type: none"> ●time pressures <p>4. Interpersonal barriers</p> <ul style="list-style-type: none"> ●cultural differences ●age differences ●sub-group differences ●status differences ●economic differences ●professional differences ●“in-group/out-group” differences <p>5. Language barriers</p> <ul style="list-style-type: none"> ●having different professional or cultural vocabularies ●same words have different meanings to different people; ●inadequacy of words to express difficult concepts, relationships or situations; ●non-fluency with language of the conversation using vocabulary beyond the comprehension of the other
<p>019Ta – TO DESIGN AND FACILITATE DEVELOPMENTAL ACTIVITIES</p>	<p>In preparing for 019Ta, think about a therapeutic activity you have designed and animated.</p> <p><i>What was the goal of the activity? How did it relate to the need(s) of the client(s)? What animation skills helped increase participation? When we design and animate activities, we also evaluate the achievement of the objective(s). What would have made the activity you designed and animated more effective?</i></p>	

<p>019Y – TO DEVELOP A TRUSTING RELATIONSHIP</p>	<p>In preparing for 019Y, consider the table on the right and review the counselling micro-skills used by the SCC. <i>What micro-counselling skills do you use daily with your clients, colleagues, families?</i></p>	<table border="1"> <tr> <td>Relationship Building</td> <td> Promoting core conditions <ul style="list-style-type: none"> • Congruence • Empathy • Positive regard </td> <td> Active listening <ul style="list-style-type: none"> • Attending • Silence • Paraphrasing • Summarizing • Questioning • Empathy </td> <td> Defining and sustaining the relationship <ul style="list-style-type: none"> • Contracting (relationship, sessional, anticipatory) • Immediacy • Relationship problem solving </td> </tr> <tr> <td>Exploring and Probing</td> <td> Active listening <ul style="list-style-type: none"> • Attending • Silence • Paraphrasing • Summarizing • Questioning • Empathy </td> <td> Other interviewing skills <ul style="list-style-type: none"> • Directives • Simple encouragers • Counsellor self-disclosure • Humour </td> <td> Other interviewing skills (cont'd) <ul style="list-style-type: none"> • Open-ended statements • Responding to nonverbal cues • Managing transitions </td> </tr> <tr> <td>Empowering</td> <td> Building strengths <ul style="list-style-type: none"> • Defining client capacities and rights • Defining problems as opportunities • Identifying resources • Reframing </td> <td> Teaching <ul style="list-style-type: none"> • Skills training • Modelling • Role-playing • Information giving • Advice and information • Referring • Answering questions </td> <td> Supporting <ul style="list-style-type: none"> • Reassuring • Fostering optimism • Reinforcing • Advocating • Providing direct aid • Praising </td> </tr> <tr> <td>Challenging</td> <td> Confronting <ul style="list-style-type: none"> • Providing critical feedback • Promoting strengths • Encouraging • Correcting distortions • Reframing • Asking clients to take responsibility </td> <td> Action planning <ul style="list-style-type: none"> • Defining clear and measurable goals • Helping clients identify and evaluate alternatives • Helping clients choose, develop, and carry out change strategies </td> <td> Use of power and authority <ul style="list-style-type: none"> • Setting limits • Enforcement </td> </tr> </table>	Relationship Building	Promoting core conditions <ul style="list-style-type: none"> • Congruence • Empathy • Positive regard 	Active listening <ul style="list-style-type: none"> • Attending • Silence • Paraphrasing • Summarizing • Questioning • Empathy 	Defining and sustaining the relationship <ul style="list-style-type: none"> • Contracting (relationship, sessional, anticipatory) • Immediacy • Relationship problem solving 	Exploring and Probing	Active listening <ul style="list-style-type: none"> • Attending • Silence • Paraphrasing • Summarizing • Questioning • Empathy 	Other interviewing skills <ul style="list-style-type: none"> • Directives • Simple encouragers • Counsellor self-disclosure • Humour 	Other interviewing skills (cont'd) <ul style="list-style-type: none"> • Open-ended statements • Responding to nonverbal cues • Managing transitions 	Empowering	Building strengths <ul style="list-style-type: none"> • Defining client capacities and rights • Defining problems as opportunities • Identifying resources • Reframing 	Teaching <ul style="list-style-type: none"> • Skills training • Modelling • Role-playing • Information giving • Advice and information • Referring • Answering questions 	Supporting <ul style="list-style-type: none"> • Reassuring • Fostering optimism • Reinforcing • Advocating • Providing direct aid • Praising 	Challenging	Confronting <ul style="list-style-type: none"> • Providing critical feedback • Promoting strengths • Encouraging • Correcting distortions • Reframing • Asking clients to take responsibility 	Action planning <ul style="list-style-type: none"> • Defining clear and measurable goals • Helping clients identify and evaluate alternatives • Helping clients choose, develop, and carry out change strategies 	Use of power and authority <ul style="list-style-type: none"> • Setting limits • Enforcement
Relationship Building	Promoting core conditions <ul style="list-style-type: none"> • Congruence • Empathy • Positive regard 	Active listening <ul style="list-style-type: none"> • Attending • Silence • Paraphrasing • Summarizing • Questioning • Empathy 	Defining and sustaining the relationship <ul style="list-style-type: none"> • Contracting (relationship, sessional, anticipatory) • Immediacy • Relationship problem solving 															
Exploring and Probing	Active listening <ul style="list-style-type: none"> • Attending • Silence • Paraphrasing • Summarizing • Questioning • Empathy 	Other interviewing skills <ul style="list-style-type: none"> • Directives • Simple encouragers • Counsellor self-disclosure • Humour 	Other interviewing skills (cont'd) <ul style="list-style-type: none"> • Open-ended statements • Responding to nonverbal cues • Managing transitions 															
Empowering	Building strengths <ul style="list-style-type: none"> • Defining client capacities and rights • Defining problems as opportunities • Identifying resources • Reframing 	Teaching <ul style="list-style-type: none"> • Skills training • Modelling • Role-playing • Information giving • Advice and information • Referring • Answering questions 	Supporting <ul style="list-style-type: none"> • Reassuring • Fostering optimism • Reinforcing • Advocating • Providing direct aid • Praising 															
Challenging	Confronting <ul style="list-style-type: none"> • Providing critical feedback • Promoting strengths • Encouraging • Correcting distortions • Reframing • Asking clients to take responsibility 	Action planning <ul style="list-style-type: none"> • Defining clear and measurable goals • Helping clients identify and evaluate alternatives • Helping clients choose, develop, and carry out change strategies 	Use of power and authority <ul style="list-style-type: none"> • Setting limits • Enforcement 															
<p>01A9 – CULTURE AND DIVERSITY</p>	<p><i>Think about the clients and colleagues you have worked with. How do you show cultural sensitivity as an SCC?</i></p>	<p>COMPONENTS OF CULTURALLY COMPETENT CARE</p> <p>CULTURAL AWARENESS involves self-examination of in-depth exploration of one's cultural and professional background. This component begins with insight into one's cultural healthcare beliefs and values. A cultural awareness assessment tool can be used to assess a person's level of cultural awareness.</p> <p>CULTURAL KNOWLEDGE involves seeking and obtaining an information base on different cultural and ethnic groups. This component is expanded by accessing information offered through sources such as journal articles, seminars, textbooks, internet resources, workshop presentations and university courses.</p> <p>CULTURAL SKILL involves the nurse's ability to collect relevant cultural data regarding the patient's presenting problem and accurately perform a culturally specific assessment. The Giger and Davidhizar model offers a framework for assessing cultural, racial and ethnic differences in patients.</p> <p>CULTURAL ENCOUNTER is defined as the process that encourages nurses to directly engage in cross-cultural interactions with patients from culturally diverse backgrounds. Nurses increase cultural competence by directly interacting with patients from different cultural backgrounds. This is an ongoing process; developing cultural competence cannot be mastered.</p> <p>CULTURAL DESIRE refers to the motivation to become culturally aware and to seek cultural encounters. This component involves the willingness to be open to others, to accept and respect cultural differences and to be willing to learn from others.</p>																
<p>01A1 – WORKING WITH GROUPS: GROUP DEVELOPMENT AND CONFLICT</p>	<p>SCCs must be aware of the many factors that can affect a group's emotional climate. A group climate is the emotional atmosphere, the overall tone that is created by the way we communicate in groups. Individuals in a positive group climate feel valued and supported. <i>How do you create a positive group climate, show leadership, and resolve conflict?</i></p> <p>Conflict is inevitable in groups and even helpful. One model for resolving conflicts is the Win-Win Approach.</p>																	

What conflicts have you experienced? How have you dealt with them?
How could you have dealt with them?

being treated well by the group. Those in a negative climate do not feel valued, supported and respected, trust is minimal, and members perceive that they are not being treated well.

Negative Climate	Positive Climate
Inappropriate style of leadership	Style of leadership (autocratic, laissez-faire, democratic) fits group task or goal
Task and purpose are obscure or not communicated	Task well prepared and presented. Clarity of purpose
Procedures not in line with objectives	Procedures are in line with objectives
Group size not suitable for task	Size of group is appropriate
Group composition not conducive to objectives	Composition of group in line with objectives
Time of meeting is when members are tired, overloaded, or have "had enough"	Time of meeting well chosen and convenient to all; time available fits the task
No recognition given to what members are bringing in	"Unfinished business" or members' baggage is cleared away
No attempt to surface "hopes and concerns" or to identify common purpose	Contract worked out, expectations surfaced
Process is vague, ill-defined; irrelevancies pursued	Clarity of purpose; purpose pursued
Individuals or small cliques dominate	Participation evenly distributed
Conflict buried or ignored	Conflict, if present, is brought out and dealt with
Ground rules not thought out nor communicated	Ground rules outlined and accepted
Leader not alert to dynamics of group or skilled enough to deal with issue	Leader has necessary observation and group management skills
Lightness not present or type of humour not appropriate	Humour used to "lighten" session at appropriate stages
Low trust level. Group members feel ill-at-ease or feel the need to be defensive	High trust level, achieved by use of trust-building skills
Competitive attitude and win-lose approach by members	Cooperation and problem-solving approach by group
Over-critical or attacking type feedback in evidence	Feedback skills properly employed
"In" groups or "pairing" obvious. Leader related particularly to one or two members	Group relationships shared. Leader's relationships evenly distributed
Specialist or jargon language can produce alienation	Language appropriate to the group
No follow-up on group decisions	Action taken on group decisions
Feelings not checked out - assumptions made by leader on how members are feeling	Feelings of individuals checked out at times during the session
Silence becomes threatening and creates awkwardness	Silence used positively for thought and reflection

Above are ways that contribute to either a positive or negative group climate.

01AB – TO INTERVENE IN A CRISIS

SCCs often work with clients who can go into crisis. It is important to have a framework related to a crisis intervention model. The ABC model below to the right provides such a framework:

*Think of a time when you intervened in a crisis.
How did you know the client was escalating?
What strategies helped de-escalate the crisis?
How did you protect yourself, the client and the immediate environment?*

SCCs need to have a framework for assessing the level of risk or danger when someone is presenting with suicidal ideation. Below is one assessment method that can be used:

THE ABC MODEL OF CRISIS INTERVENTION

- **A: Developing strong rapport**
 - Basic attending skills
 - CI worker perceived by client as empathic, present, nonjudgmental, genuine
- **B: Identifying the nature of the crisis and altering perceptions**
 - Most important phase of CI model
 - Using skills in Phase A, identify precipitating event, perspective, subjective distress, current and previous functioning
 - Provide new ways for client to think about, perceive, process the situation
- **C: Offering coping skills**
 - Encourage & listen to client's ideas for coping before offering CI worker's ideas
 - Plan for Follow-up of some type

Use the acronym IS PATH WARM? to remember these warning signs.

IDEATION Threatened, communicated, spoken or written

SUBSTANCE ABUSE Excessive or increased use

PURPOSELESSNESS Feeling or stating there is no reason for living

ANXIETY Agitation, inability to sleep or sleeping all the time

TRAPPED FEELING Feeling or stating there is no way out

HOPELESSNESS Feeling or stating things will never get better

WITHDRAWAL From family, friends and society

ANGER Uncontrolled rage or seeking revenge

RECKLESSNESS Risky or impulsive acts that are out of character

MOOD CHANGE A dramatic shift

Source: UofSC Student Health Services

01A4 – PROTECTION OF SELF AND OTHERS

SCCs need to be aware of how to protect themselves and others when it comes to the risk of the spread of infection. Being familiar with the protective measures in your agency is important.

Being familiar with the signs, symptoms and ways of preventing burnout is also an important part of protecting self and others.

signs of
BURNOUT

exhaustion

isolation

escape fantasies

irritability

frequent illness

healthline

**UNIVERSAL PRECAUTIONS
IN PATIENT CARE**

Includes Blood
and
All Body Fluids

01A8- TO DEVELOP AN INTERVENTION PLAN

Special Care Counsellors write intervention plans for their clients to address priority needs. Before writing an intervention plan, SCCs need to assess their client’s strengths, abilities, interests, and challenges. Below are some elements in the assessment process:

Elements of the assessment process

1. Review of records/history
2. Medical/physical evaluation
3. Direct observation
4. Indirect observation
5. Interviews
6. Evaluations and assessments (cognitive, psychological, adaptive functioning, mental health, communication, social competence)
7. Anecdotal reports: behaviours, incidents, interests, activities
8. Family functioning

Once the assessment is complete, the SCC will identify an overall long-term goal and SMART objectives to reach that goal. To the right is a format for writing SMART objectives:

Think of an intervention plan you have been involved in. What was the goal, SMART objectives, and methods or activities you implemented to reach the overall goal?

Specific	Is the objective precise and well-defined? Is it clear? Can everyone understand it?
Measurable	How will the individual know when the task has been completed? What evidence is needed to confirm it? Have you stated how you will judge whether it has been completed or not?
Achievable	Is it within their capabilities? Are there sufficient resources available to enable this to happen? Can it be done at all?
Realistic	Is it possible for the individual to perform the objective? How sensible is the objective in the current business context? Does it fit into the overall pattern of this individual's work?
Timely	Is there a deadline? Is it feasible to meet this deadline? Is it appropriate to do this work now? Are there review dates?

019Tb – TO DEVELOP CLINICAL TOOLS

In the SCC field, a clinical tool is defined in a broad sense to include any item, piece of equipment, or product, whether handmade, acquired commercially off the shelf, modified, or customized that is used to increase, maintain, or improve the adaptive and/or functional capabilities of a person with a disability, special need, and/or social adjustment issue.

Some examples of clinical tools include:
 Client worksheets to reinforce concepts shown (CBT)
 Reinforcement Schedules (token economy systems)
 Communication Aids (bliss symbolics)
 Zones of Regulation systems used in classrooms
 Games adapted for a particular purpose (e.g., to promote fine-motor skills)
 Recreational equipment used for a particular purpose (e.g., to enhance gross-motor development)
 Adaptive devices and assistive technologies

		<p>And so many more.... Come prepared to discuss a clinical tool have you designed and used with your clients.</p> 										
<p>019U – CLIENT’S LIVING ENVIRONMENT</p>	<p>Special Care Counsellors must be aware of the many factors that impact their clients. These factors are related to the client’s living environment and can either be protective or put them at an increased risk.</p> <p><i>What are some examples of the physical and social factors you are aware of that may impact your client’s development, either positively or negatively. Come prepared to identify some examples.</i></p>	 <table border="1"> <thead> <tr> <th>Risk Factors</th> <th>Protective Factors</th> </tr> </thead> <tbody> <tr> <td>Systems breakdown, Poor governance, Weak institutions, Discriminatory / harmful social norms</td> <td>Functional services, Social safety net, Stable government, Humanitarian access</td> </tr> <tr> <td>Primary / Secondary displacement, Disintegration of networks, Lack of community cohesion</td> <td>Strong social networks, Everyday activities, Traditional / community events, Self-help groups</td> </tr> <tr> <td>Household composition, Poverty, Lack of economic opportunity, Negative coping, Social isolation</td> <td>Community support, Family strengthening, Economic stability, Sources of social connection</td> </tr> <tr> <td>Young, Female, Disabled / ill, Non-biological child, Unaccompanied, Living in institutional care, Caregiver has impaired parenting capacities</td> <td>Resilience, Secure attachment relationships, Supportive social systems</td> </tr> </tbody> </table>	Risk Factors	Protective Factors	Systems breakdown, Poor governance, Weak institutions, Discriminatory / harmful social norms	Functional services, Social safety net, Stable government, Humanitarian access	Primary / Secondary displacement, Disintegration of networks, Lack of community cohesion	Strong social networks, Everyday activities, Traditional / community events, Self-help groups	Household composition, Poverty, Lack of economic opportunity, Negative coping, Social isolation	Community support, Family strengthening, Economic stability, Sources of social connection	Young, Female, Disabled / ill, Non-biological child, Unaccompanied, Living in institutional care, Caregiver has impaired parenting capacities	Resilience, Secure attachment relationships, Supportive social systems
Risk Factors	Protective Factors											
Systems breakdown, Poor governance, Weak institutions, Discriminatory / harmful social norms	Functional services, Social safety net, Stable government, Humanitarian access											
Primary / Secondary displacement, Disintegration of networks, Lack of community cohesion	Strong social networks, Everyday activities, Traditional / community events, Self-help groups											
Household composition, Poverty, Lack of economic opportunity, Negative coping, Social isolation	Community support, Family strengthening, Economic stability, Sources of social connection											
Young, Female, Disabled / ill, Non-biological child, Unaccompanied, Living in institutional care, Caregiver has impaired parenting capacities	Resilience, Secure attachment relationships, Supportive social systems											
<p>019R-2-9 – CLIENT GROUP TRAITS AND CHARACTERISTICS</p>	<p>SCCs are trained to work with many client groups. Come prepared to the validation interview ready to share the traits and characteristics of at least three client groups you are most familiar with. Below are the eight client groups:</p> <ul style="list-style-type: none"> • Clients with an intellectual disability • Clients with a physical or neurological impairment • Clients with Autism Spectrum Disorder • Clients with a mental health or substance abuse issue • Young people with a social adjustment issue • Clients experiencing violence and social exclusion 	<p>You can refer to this website to see an example of the traits and characteristics related to a client with Autism Spectrum Disorder: https://www.dshs.wa.gov/sites/default/files/DDA/dda/documents/B.%20Module%201%20Content.pdf</p> <p>Or, take a look at the example below of some traits and characteristics related to a client with Autism Spectrum Disorder:</p>										

	<ul style="list-style-type: none"> • Clients with language and/or learning disabilities • Older adults experiencing lack of autonomy 	<h3 style="color: #4a7ebb;">ASD signs and symptoms</h3> <p>Signs and symptoms of autism spectrum disorder (ASD) include:</p> <ul style="list-style-type: none"> • displays a lack of interest in others and has difficulty relating to them (absence of joint attention—the shared focus of two people on one object) • avoids eye contact • fails to point at objects to convey interest or fails to look at objects when others point at them • prefers solitude • does not empathize • has difficulty conveying personal needs and desires • exhibits unusual responses to sights, smells, tastes, textures, or sounds • does not engage in pretend play • prefers not to be touched or to be touched only on his or her own terms • appears unaware when others address him or her and/or is hyperattentive to other sounds • fails to initiate play/interactions • repeats/echoes words or phrases said, or repeats words or phrases in place of normal language (scripting) • displays restricted, repetitive actions • has difficulty navigating routine changes • exhibits loss of skills previously attained (regression). <p><small>Source: Centers for Disease Control and Prevention. Autism spectrum disorder (ASD): Signs and symptoms. 2015. cdc.gov/ncbddd/autism/signs.html</small></p>
<p>CLIENT GROUPS AND INTERVENTION PLANNING</p>	<p>Think about clients you have worked with from each of the three client groups above that you have identified. Be prepared to discuss their strengths, interests and challenges and the priority goal that you identified as being the most important to work on.</p> <p><i>What strategies and/or activities did you use (or would you use)? On your left is a list of steps to use as a guide in developing an intervention plan.</i></p>	<p>Step 1. List client’s challenges, problems, needs (from your observations):</p> <p>Step 2. From the above list, identify one priority need for intervention:</p> <p>Step 3. List client’s strengths, abilities, interests</p> <p>Step 4. Long-term Goal: (Must address priority need)</p> <p>Step 5. Short-Term SMART Objectives: (Each objective should help client achieve the long-term goal)</p> <p>Objective 1:</p>

		<p>Objective 2:</p> <p>Step 6. Methodology Section: This is your activity plan: (Describe in detail; link methods/activities/tools to the stated objectives)</p> <p>Objective 1 – implementation steps, activities and tools that will help meet this objective:</p> <p>Objective 2 – implementation steps, activities and tools that will help meet this objective:</p>
<p>INTEGRATION OR REINTEGRATION</p>	<p>In the criminal justice system, reintegration refers to the process of re-entry into society by persons that have been in prison, or incarcerated. SCCs also work to reintegrate their clients from outside agencies back into their original environments. For example, SCCs can work with clients who leave their school for a period of months before being reintegrated.</p> <p><i>Think about a client you have worked with that has either been integrated or reintegrated into your work/school environment. What needed to happen for the reintegration to be successful? What steps needed to be taken to ensure a smooth, seamless reintegration?</i></p>	<p>Watch this video for an example of an integration program for women who want to integrate or reintegrate into the workforce through the YWCA: https://youtu.be/FTzCISc0sqq</p> 
<p>TO ANALYZE A SOCIAL ADJUSTMENT ISSUE</p>	<p>The definition of a social problem has both an objective component and a subjective component. The objective component involves empirical evidence of the negative consequences of a social condition or behavior, while the subjective component involves the perception</p>	<p>Look at this website for some examples of current social issues in Canada: https://www.c2d2.ca/#:~:text=When%20it%20comes%20to%20social,are%20often%20in%20stark%20conflict. Current social issues in Canada include:</p>

that the condition or behavior is indeed a problem that needs to be addressed.

Come prepared to discuss an issue that you have experienced or witnessed either in your workplace or your community. Some issues include bullying, racial discrimination, poverty, etc. What issues have you personally witnessed in your workplace?

TO DESIGN AN INTEGRATED INTERVENTION PLAN

In their role, SCCs observe and identify social adjustment problems that are impacting their clients and that may not be adequately addressed. SCCs address the issue by researching and learning about current best practices through academic and field research. *What interventions can you think of that would address the psychosocial adjustment issue you have identified?*
